## SAINT LUCIA

STATUTORY INSTRUMENT, 1995, No. 66

[ 21st October, 1995

The Minister responsible for Agriculture, in exercise of the power conferred by section 36 of the Plant Protection Act 1988, No 21, makes the following Regulations

### Short title

1. These Regulations may be cited as the Plant Protection Regulations, 1995.

### Interpretation

2. In these Regulations –  
"designated officer" means an officer of the Ministry of Agriculture designated under section 15 of the Plant Protection Act, 1988;  
  
"fruits" and "vegetables" include all edible portions of food plants in the raw or unprocessed state;  
  
"plant pest" means any living stage of any insect, mite, nematode, slug, snail, protozoa or other invertebrate or vertebrate animal, bacterium, fungus, weed, parasitic plant or reproductive part of it, virus, mycoplasma, or any organism similar or allied with any of the foregoing capable of causing damage to any plant or plant product;  
  
"planting material" includes trees, shrubs, vines, cuttings, grafts, scions, buds, bulb roots, seeds, explants and any other plant part capable of propagation;  
  
"soil" means the loose surface material of the earth in which plants grow, in most cases consisting of disintegrated rock with an admixture of organic material and soluble salts.

### Ports of entry

- 3.—(1) The ports specified in the First Schedule are designated ports of entry for the purposes of plant quarantine.
- (2) Services for plant quarantine shall be provided in these ports during normal working hours.

### Entry requirements

4.—(1) All fruits, vegetables, planting materials, plant products, or any other plant or non-plant article, the entry of which presents a pest risk to the agriculture of Saint Lucia, will be subject to examination on arrival in Saint Lucia by a designated officer and if necessary, to treatment for the prevention of pest entry, or to destruction or return to the country of origin, as the case may warrant.

(2) All treatments performed under subregulation (1) are at the sole risk of the importer or his agent.

### Exemption

5.—(1) Plants imported by or for the Ministry of Agriculture are exempted from the prohibitions and restrictions under these Regulations.

(2) Notwithstanding subregulation (1), importation by or for the Ministry of Agriculture shall be subject to measures prescribed by the Plant Quarantine Service to prevent pest entry and dissemination.

### Phytosanitary certificate

6. All consignments of plants entering Saint Lucia shall be accompanied by a phytosanitary certificate based on the International Plant Protection Convention (IPPC) of 1951, a model of which is specified in Form No. of the Second Schedule.

### Fruits and vegetables

7.—(1) Admissibility of fruits and vegetables for importation shall be determined by the Plant Quarantine Service at the time application for permit for importation is submitted.

(2) Entry status shall be determined according to the pests present in the exporting country.

(3) Importation of soft, fleshy fruits and vegetables is prohibited from all countries where the Mediterranean, Mexican, Oriental, Queensland and other fruitflies of the family tephritidae are known to occur, unless approved treatment can be performed.

(4) Fruits and vegetables arriving in passenger baggage or personal effects without the necessary permit shall be confiscated and destroyed.

(5) Dried, frozen, processed, preserved or canned fruits and vegetables that have been prepared or processed in such a manner as to make them innocuous as pest carriers, and are not otherwise prohibited under these Regulations and in particular, the Third Schedule, are enterable subject to verification of their condition and freedom from pests.

**In vivo planting material (macro-propagules)**

8.—(1) The entry of trees, shrubs, vines, cuttings, grafts, scions, buds, bulbs, roots, seeds and any other plant part capable of propagation for planting purposes shall be limited to the smallest possible propagative unit consistent with good horticultural practices.

(2) Importation of plants, rooted-cuttings, or any other plant part is limited to soil-free plants and plant parts.

(3) An approved packing material shall be used around the roots of plants after the soil has been removed.

(4) Plants, rooted-cuttings and other propagative units if established in a soil medium, and bulbs, tubers, roots, seed, etc if pre-potted or pre-planted in trays or pots of growing media are not admissible because entry of such material makes adequate inspection of roots or plant parts impossible.

(5) Entry for seed shall be restricted to forest trees and other plant species normally grown from seed.

(6) All planting material shall be subject to inspection and treatment as may be necessary, as a condition for entry.

**In vitro planting material (micro-propagules)**

9.—(1) In vitro plantlets, containers and culture media shall be free of pests, bacteria, fungi and viruses before entry into the island will be permitted.

(2) Contaminated cultures and explants from stock plants that have not been grown in vitro (i.e. primary explants) shall not be permitted to enter the island.

(3) Any material originally from a country with a pest or disease of quarantine importance shall not be allowed into the island unless certified and proven disease free.

(4) At least one subculture is required before plantlets shall be allowed entry.

(5) In order to enable detection of bacterial contamination, antibiotics, charcoal or any substance that would render the media opaque or coloured shall not be present in culture media.

(6) All in vitro propagules, shall be accompanied by a phytosanitary certificate from the country of origin.

(7) Once in-vitro planting material has been allowed entry into the island, multiplication or research in laboratory or field conditions shall be conducted under observation for a time period specified by the Plant Quarantine Service.

**Plant pests**

10.—(1) The entry of plant pests as defined in section 2, or beneficial organisms, shall be limited to entries under permit issued to and destined for recognized scientific and research institutions and the entry shall be subject to conditions specified by the Minister under section 5 of the Plant Protection Act, 1988.

(2) Such importations shall be subject to safeguards as specified on the permit for importation.

**Soil**

11. (1) The entry of soil shall be limited to entries under permit issued to and destined for recognized scientific and research laboratories as specified in Form No. 2 under the Second Schedule.

(2) Importation under subregulation (1) shall be subject to the following—

- (a) specific safeguards specified in the import permit;
- (b) entry shall be limited to quantities specified in the permit,
- (c) the soil shall be shipped in sturdy, tightly-sealed containers;
- (d) the soil shall be used only in the permittee's laboratory;
- (e) the soil shall be incinerated or otherwise sterilized in an approved manner at the conclusion of the test.

(3) The entry of any plant or plant product, machinery, equipment or conveyance of any kind, carrying or contaminated with soil, is prohibited; such articles shall be freed from soil and the pest risk eliminated in a manner approved by the Plant Quarantine Service.

(4) Non-plant articles contaminated with soil or infested with plant pests are subject to such cleaning or treatment as may be necessary to eliminate any pest risk associated with their entry into Saint Lucia.

**Mail importation**

12.—(1) Any plant or plant product imported through the mail shall be subject to these Regulations.

(2) These Regulations shall be enforced with respect to plants imported under subregulation (1) by the team work of the Postal Services, Customs and Excise Department and the Plant Quarantine Service.

**Packing materials**

13.—(1) The following materials are prohibited for use as packing materials

- (a) Banana plants, plant parts, and other plants of the musaceae family;
- (b) coconut plants and plant parts;

- (c) citrus plants and plant parts;
- (d) coffee plants and plant parts;
- (e) cotton plants, plant parts and-unprocessed cotton products;
- (f) forest litter;
- (g) grass plants and plant parts;
- (h) leaves, stems and roots of plants in general;
- (i) rice straw and hulls;
- (j) sugarcane plants and plant parts;
- (k) soil.

(2) Notwithstanding subregulation (1), any plant or part of a plant for which entry is prohibited in the Third Schedule shall be prohibited for use as a packing material.

- (3) Packing materials specifically authorised include—
- a) sterilized peat or sphagnum moss;
  - b) excelsior or wood's wool;
  - c) osmonda fiber;
  - d) vermiculite,
  - e) ground cork;
  - f) treated wood shavings;
  - g) paper pulp;

### Safeguards

14.—(1) Plant materials subject to safeguard regulations are also subject to permit requirements as directed by the Plant Quarantine Service.

(2) Procedures employed shall be those that impose a minimum Of inconvenience to the shipper and carrier and are consistent with proper precautions against pest entry or dissemination.

(3) Plant materials subject to safeguard regulations which are not in compliance with the requirements may be seized, destroyed, or otherwise disposed of.

(4) Inspection of plant materials covered by these regulations shall be performed as soon after arrival as practical, and the conditions necessary to prevent pest dissemination shall be specified at that time if prior arrangements have not already been made.

(5) Plant material shall not be released from the custody of Customs until safeguard requirements have been met and approved by the designated officer.

(6) The Department of Customs and Excise shall give the Plant Quarantine Service at least twenty four hours notice for any necessary inspection to be done by the Plant Quarantine Service.

(7) Any treatments performed under this section are made at the sole risk of the owner or his agent.

(8) Plant material refused entry is subject to safeguards until re-exported or destroyed.

(9) Garbage or refuse entering the territorial waters, or temporarily in the ports of Saint Lucia, is subject to such safeguards as specified by the Plant Quarantine Service in cooperation with the other Governmental agencies in charge of public health, animal health etc.

(10) The landing of garbage is prohibited except in unusual circumstances and in these instances, prior approval shall be obtained from the Plant Quarantine Service or any other concerned agency.

(11) Garbage retained on board in transit vessels and aircraft shall be enclosed in tightly sealed, insect-proof containers to prevent insect escape and in the case of ships in port, shall be inside the ship's rail.

### Export Regulations

15.—(1) The Plant Quarantine Service may issue phytosanitary certificates based on inspections performed at the request of exporters to aid them in meeting the entry requirements of the importing country.

(2) Certificates issued under subregulation (1) shall be for products grown or produced in Saint Lucia only.

(3) Only a re-export certificate as specified in Form No. 3 in the Second Schedule can be issued for products grown or produced in another country.

(4) The issuance of a phytosanitary certificate in no way releases the exporter from compliance with any export regulations of the Government of Saint Lucia.

(5) The phytosanitary certificate issued under this Regulation shall be based on the model of that adopted by the International Plant Protection Convention of 195 1, as revised and approved.

### Import permit

16.—(1) No person shall import or offer for entry into Saint Lucia any planting material, fruit, vegetable, plant product, handicraft items from plant, plant materials or plant products plant pests, predators or parasites of plant pests, or soil except under a permit specified in Form No. 4 of the Second Schedule issued by the Minister in accordance with the Plant Protection Act, 1988.

(2) An application for a permit to import shall be made in writing at least four weeks prior to the importation of planting material and at least two weeks prior to importation of plant parts (e.g. fruits, vegetables and cut flowers), and addressed to the Plant Quarantine Service of Saint Lucia stating –

- (a) full name, residence and postal address of the applicant;
- (b) name and address of exporter or persons from whom the material will be obtained;
- (c) the quantity and botanical names of all material applicant proposes to import;
- (d) country of origin, including specific locality within the country, of material to be imported;
- (e) the exact location in Saint Lucia where the material will be grown or utilized; and
- (f) the mode of transport, the port of entry and approximate date of arrival of the shipment, as in Form No. 5 of the Second Schedule.

**Restrictions and prohibitions specified in Third Schedule**

17.—(1) The Major economic crops and other related genera of plants, the unrestricted entry of which would pose a pest risk to the country are specified in the Third Schedule.

(2) Plant genera not specified in the list shall also be subject to plant import requirements contained in these Regulations.

(3) Prohibitions or restrictions with respect to unlisted genera shall be determined at the time of receipt of application by the Plant Quarantine Service.

(4) All references to phytosanitary certificate in the Third Schedule shall be reference to Form No. 1 in the Second Schedule.

**FIRST SCHEDULE**

(Regulation 3)

DESIGNATED PORTS OF ENTRY

FOR THE PURPOSE OF PLANT' QUARANTINE

1. Port of Castries
2. Cul De Sac Bay
3. Hewanorra International Airport
4. Vigie Airport
5. Port of Vieux Fort
6. Rodney Bay
7. Marigot Bay
8. Port of Soufriere

(Regulation 17)

MAJOR ECONOMIC CROPS OF THE CARIBBEAN, GENERA OF PLANTS,  
 THE UNRESTRICTED ENTRY OF WHICH WOULD POSE A PEST RISK.

- GROUP**
- I. Cereal crops
  - II. Fibre crops
  - III. Fruit crops
  - IV. Grain and pasture legumes
  - V. Oil and plantation crops
  - VI. Vegetable crops
  - VII. Ornamentals and cut flowers
  - VIII. Forest species and products
  - IX. Herbs and spices
  - X. Wild plants, grasses, aquatic plants, parasitic plants, etc.

## GROUP 1 - CEREAL CROPS

PLANT MATERIAL	PARTS OF PLANT	COUNTRIES TO WHICH RESTRICTION APPLY	RESTRICTION	REASONS AND/OR CONDITION
MAIZE ( <i>Zea mays</i> ) and all other Maydeae including	All parts except seed for consumption and propagation	All countries	Prohibited	Exclusion of downy mildew other <i>Sclerospora</i> spp stem borer ( <i>Chilo</i> spp), (Sesames spp), smut and rust and other species
<i>Chionache</i> spp <i>Coix lachryma-jobi</i> <i>Euchlaena mexicana</i> <i>Polytoca</i> spp <i>Sclerachne punctata</i> <i>Trilobachne cookei</i>	Seed for propagation	Countries in Asia East of 60 degrees longitude	Post-entry quarantine	Exclusion of downy mildews
	Unmilled grain for consumption purpose	Countries in Asia East of 60 degrees longitude	Permit	Subject to steam or other type of sterilisation treatment as a condition for entry
MILLETS <i>Echinochloa colona</i> <i>E. decompositum</i>	All parts except seed for propagation and vegetative	All countries	Prohibited	Exclusion of pests and pathogens of millets and other graminaceous crops
<i>Eleusine coracana</i> <i>Panicum miliaceum</i> <i>P. miliare</i> <i>Paspalum scobiculatum</i> <i>Pennisetum typhoide</i> <i>Setaria italica</i>	propagating material			
	Vegetative propagating material	All countries	Post-entry quarantine	Exclusion of smuts ( <i>Tolyposporium</i> sp) Rust ( <i>Puccinia</i> spp) and mildew ( <i>Sclerospo</i> sp)
	Seed for propagation	All countries	Permit	Phytosanitary certificate
RICE <i>Oryza</i> spp	All parts except seed for propagation and milled or polished rice, except seed	All countries	Prohibited	Exclusion of dangerous pests and pathogens of rice

PLANT MATERIAL	PARTS OF PLANT	COUNTRIES TO WHICH RESTRICTION RESTRICTION APPLY	REASONS AND/OR CONDITION
	Seed for propagation (rough or paddy rice)	All countries	Post-entry quarantine Exclusion of black ring <i>Ephelis oryzae</i> downy mildew ( <i>Sclerospora oryzae</i> leaf blight <i>Xanthomonas oryzaicola</i> Ufra disease ( <i>Ditylenchus angustus</i> ), and strains of <i>Piricularia oryzae</i>
	Milled polished, or parboiled for consumption	All countries	None None
SORGHUM <i>Sorghum vulgare</i> <i>S. sudanense-sudan</i> grass <i>S. bicolor</i> var. <i>technicum</i> brochorn and other cultivated <i>Sorghum</i> spp	All parts except seed for consumption and seed propagation	All countries	Prohibited Exclusion of pests and pathogens of sorghum and related plants
	Seed for consumption	Countries East of 60 degrees longitude, Europe and USA	Prohibited Exclusion of downy mildews ( <i>S. clerospora macrospora</i> <i>S. philippinensis</i> and <i>S. sacchari</i> )
		All others	Permit Verification of origin
	Seed for propagation	Countries East of 60 degrees longitude, Europe and USA	Prohibited Exclusion of downy mildews ( <i>Sclerospora macrospora</i> , <i>S. sacchari</i> )
		All others	Permit Phytosanitary certificate

*Plant Protection Regulations*  
**GROUP II – FIBER CROPS**

301

PLANT MATERIAL	PARTS OF PLANT	COUNTRIES TO WHICH RESTRICTION APPLY	RESTRICTION	REASONS AND/OR COMMON
COTTON and other <i>Gossypium</i> spp	All parts except seed; cotton seed cake, meal oil, lint and lint samples	All countries	Prohibited	Exclusion of viral, fungal and bacterial diseases of cotton boll weevil ( <i>Anthonomus grandis</i> and other cotton pests
	Cotton seed	All countries where <i>Fusarium</i> , wilt is known to Occur	Post-entry quarantine	Exclusion of <i>Fusarium</i> wilt ( <i>Fusarium oxysporum</i> f.sp. <i>vasinfectum</i> ) and other dangerous cotton diseases
		All others	Permit	(a) Phytosanitary certificate (b) Additional declarations (i) Seeds were delinted <u>chemically</u> followed by dry fungicidal seed dressing or <u>mechanically</u> followed by wet fungicidal seed dressing. (ii) <i>Fusarium</i> wilt ( <i>Fusarium oxyporum</i> f.sp. <i>vasinfectum</i> not known to occur in the country of origin.
	Cotton seed cake, meal and lint (excluding samples)	All countries	Permit	Phytosanitary certificate subject to fumigation, if necessary, to eliminate the cotton boll weevil ( <i>Anthonomus grandis</i> ) and other pests of cotton
Cotton seed oil and lint samples	All countries	None	None	

302

*Plant Protection Regulations*

PLANT MATERIAL	PARTS OF PLANT	COUNTRIES TO WHICH RESTRICTION APPLY	RESTRICTION	REASONS AND/OR COMMON
SISAL and relatives	All parts except seed	All countries	Post-entry quarantine	Exclusion of pests and pathogens of sisal
<u>Agave cantala</u> <u>A. fourcroydes</u> <u>A. sisalana</u> <u>Furcraea cabtya</u> <u>F. gigantea</u> <u>Sansevieria</u> spp	Seed	All countries	Permit	Phytosanitary certificate
<b>GROUP III – FRUIT CROPS</b>				
PLANT MATERIAL	PARTS OF PLANT	COUNTRIES TO WHICH RESTRICTION APPLY	RESTRICTION	REASONS AND/OR COMMON
APPLES <u>Pyrus</u> Spp	All parts except fruit and vegetative planting material	All countries	Prohibited	Exclusion of plant pests and diseases
	Vegetative planting material	All countries	Permit Post-entry quarantine	Phytosanitary certificate
	Fruit	All countries except Canada, USA, Chile and Europe	Prohibited	Exclusion of pests and diseases especially fruitflies <u>Anastrepha ludens</u> , <u>Ceratitis capitata</u>
AVOCADO <u>Persea americana</u>	Vegetative propagating material	USA, Canada, Chile and Europe	Permit	Phytosanitary certificate
		New South Wales (Australia), Palestine, Peru, South Africa, California, Texas (USA)	Prohibited	Exclusion of avocado sun blotch virus

*Plant Protection Regulations*

303

PLANT MATERIAL	PARTS OF PLANT	COUNTRIES TO WHICH RESTRICTION APPLY	RESTRICTION	REASONS AND/OR COMMON
		All others	Permit	(a) Phytosanitary certificate
	Seed	The countries listed above plus Mexico Central and South America, Hawaii and Sri Lanka	Prohibited	Exclusion of avocado sun blotch virus and avocado seed weevils ( <u>Conotrachelus</u> spp, <u>Stenomacris</u> <u>catenifer</u> and other avocado pests
		All others	Permit	Phytosanitary certificate
	Fruit	Countries East of 60 degrees longitude Pacific Is. Mexico Central and South America	Prohibited	Exclusion of fruit flies ( <u>Anastrepha</u> spp, <u>Bactocera</u> spp, <u>Stenomacris</u> <u>catenifer</u> <u>Conotrachelus</u> spp) and other seed weevils
		All others	Permit	Phytosanitary certificate
BANANA, PLANTAIN AND ABACA (Musa and Ensete spp) Macambu (Bluggoe)	All parts except vegetative planting material and true seed	All countries	Prohibited	Exclusion of pests and pathogens of banana and plantain
	Vegetative propagating material	All countries	Permit Post-entry quarantine	Exclusion of Moko disease ( <u>Pseudomonas solanacearum</u> ), bacterial wilt ( <u>Xanthomonas musacearum</u> ), black leaf streak ( <u>Mycosphaerella</u> sp) Black Sigatoka, Bunchy Top and other virus diseases etc. Phytosanitary certificate.
	True seed	All countries	Permit	Phytosanitary certificate

304

*Plant Protection Regulations*

PLANT MATERIAL	PARTS OF PLANT	COUNTRIES TO WHICH RESTRICTION APPLY	RESTRICTION	REASONS AND/OR COMMON
BREADFRUIT, BREADNUT JACKFRUIT <u>Artocarpus</u> spp	Vegetative planting material (Roots and Stems cuttings; Tissue culture)	Dominica, Grenada, St Vincent	Permit	Phytosanitary certificate
		All other countries	Prohibited	Exclusion of <u>Ganoderma</u> , Red root rot, or Stump rot; Branch borer ( <u>Zeuzera coffeae</u>
CITRUS Grapefruit, oranges lime etc	Vegetative propagating material France and USA (California). Other sources maybe approved as warranted	All countries except approved sources in	Prohibited	Exclusion of citrus canker ( <u>Xanthomonas citri</u> , 1-0 Cancrosis B. (a strain of the preceding), sweet orange scab ( <u>Elsinoe australis</u> , mal secco ( <u>Deuterophoma trachei phila</u> ), black spot ( <u>Guignardia citricarpa</u> ), Australian Scab ( <u>Sphaceloma fawcettii</u> var. <u>scabiosa</u> and citrus virus diseases including exocortis, xyloporosis and greening disease
		Approved sources in France, Martinique ) Guadeloupe, Florida California (USA)	Permit	(a) Phytosanitary certificate (b) Additional declaration – that material is from a recognized/approved source and that the parent plants were certified to be free of viruses
	Seed	All countries	Permit	(a) Phytosanitary certificate (b) Additional declaration – the seeds were harvested from trees that were apparently healthy.
